Front-end development

Backend

SUMMARY

Purpose-oriented developer with more than 5 years of experience in project management, development, performance enhancement, test coverage, and git strategy. I have a proven ability to lead teams to faster development. I am adept at sharing my knowledge and have published blog posts on Medium that have been viewed by over 500 people.

EXPERIENCE

Senior Software Engineer

GS Lab

12/2022 - Present Pune, IN (Remote)

<https://www.gslab.com>

Led the frontend development team

- Was responsible for mentoring, day-to-day supervision of 3 front-end developers
- Led 5 projects single-handedly, including planning, development, testing, and deployment
- Enabled localization (l18n) for adapting the application to enable its use in a particular selected language
- Developed candidate admission flow end-to-end within a short period of 2 weeks wherein I had to adapt to change quickly to meet the business goals

Software Engineer

Globant

04/2021 - 12/2022 Pune, IN (Remote)

<https://www.globant.com/>

Worked on various web development projects

- Drove React testing library setup to increase the test coverage by 75%
- Introduced the git rebasing strategy to have better commit history
- Led an agile team of 5 members to design, develop and integrate Azure functions for various automation delivery stages
- Wrote technical blogs on the company's official Medium handle which has been viewed by over 500 people

Associate Web Developer

Sungard Availability Services

02/2019 - 04/2021 Pune, IN (Remote)

<https://1111systems.com/resources/1111-systems-completes-acquisition-of-sungard-as-cm/>

Assisted in the development of web applications

- I led several projects single-handedly, mentored colleagues, held technical sessions, and introduced several new practices
- Improved application load time, memory usage by reducing the build size from 15.3 MB to 1.6 MB and implementing lazy loading
- Developed a user interface to onboard organizations which reduced the customer onboarding time from a day to a few minutes

Project Trainee

Zensar Technologies

03/2018 - 07/2018 Hyderabad, IN (On-site)

<https://www.zensar.com/>

Learned the fundamentals of web development

- Laid the foundation for a career as a web developer by learning technologies such as HTML, CSS, Python, and JavaScript

EDUCATION

Bachelor in Computer Engineering

PVG's COET

07/2013 - 05/2017 Pune, IN
